

Job Title: Project Manager (Senior)	Reports to: CEO
Duration: 1-year Fixed Term Contract	Location: Shannon, Co. Clare
Date: 28 th September 2021	Company: Future Mobility Campus Ireland CLG (FMCI for short)

Overview: Mobility is currently experiencing a wave of disruptive forces that are profoundly changing the manner in which citizens interact with their environment. Citizens increasingly want on-demand access to mobility solutions without the inconvenience of ownership of cars, while at the same time demanding the personal freedoms that are guaranteed by long-term access to personal mobility solutions. Regulators, driven by concerns by challenges such as global warming, air quality, noise pollution, the economic and societal cost of congestion, the demands of the Circular Economy, and recently by COVID-19, are placing new stringent requirements on mobility solutions. Advances in areas such as technology are also placing increased expectations on the performance of urban mobility solutions. All this is happening at a time when the motor vehicle, is itself undergoing a transformative technological revolution. These forces, and new actuation possibilities, are causing a fundamental rethink of the way mobility solutions are designed in, necessitating not only technological innovation, but also the development of new ownership and business models, new ethical models, as well as new social and economic policies. Future Mobility Campus Ireland (FMCI) is an exciting innovation in Ireland, tasked with the goal of reimagining future mobility in both urban and non-urban settings. The specific goal of FMCI is to develop a mobility campus in Shannon that will be at the forefront of global mobility innovation and to act as a catalyst for world-leading developments in the mobility domain. FMCI is now seeking to recruit a Project Manager (Senior) to lead and develop the FMCI project. Reporting directly to the CEO, the task of the role will be to contribute to the development of this project from its current start-up stage to its full fruition. We expect the ideal candidate should have experience of a leadership role in the mobility/air mobility sector. The ideal candidate should have experience in project management, research and development, commercial development, as well as a strong understanding of – and passion for – digital innovation as it pertains to the mobility sector.

- Key responsibilities**
- Oversee and manage the development of FMCI Air activities in the FMCI campus at Shannon, Ireland in collaboration with the CEO.
 - Working closely with FMCI partners and stakeholders to build the testbed infrastructure.
 - Contribute to the establishment of FMCI to position it as the key cornerstone of air mobility innovation in Ireland and beyond.
 - Initiating and managing projects that promote innovation and collaboration between FMCI, Academic Institutions, Multinationals and SME indigenous businesses and technology start-ups in Ireland to enhance their connectedness.

- Day to day management of FMCI Air activities on administrative and commercial basis.

Candidate Specification: Reporting to the CEO of FMCI and based in Shannon, Ireland, the ideal candidate should have the following experience, skills and academic qualifications:

- Extensive experience working in the Mobility and/or Information Technology industry (min 15 years).
- A record of industrial experience: work leading/managing innovation in the mobility and/or Information Technology domain.
- Excellent Project Management skills
- Highly creative with excellent analytical abilities.
- Demonstrated teamwork skills.
- Strong interpersonal and negotiation skills.

Application process:

- Candidates are required to provide a CV and a Cover Letter in PDF format
- Candidates are requested to email their applications to hr@futuremobilityireland.ie
- Deadline for applications: 13/10/2021
